

tour_corridor

Location: planning\tour_corridor

Description

This layer identifies the tourism and scenic corridors in Bay County as defined by the Bay County Board of County Commissioners. The layer has arc features only.

Source

The tourism corridors were identified in Ordinance No. 96-25 passed by the Board of County Commissioners on August 6th, 1996. Section 2 of the ordinance reads as follows:

Tourism Corridors shall mean and include the following roads within the limits of Bay County: Highway 98, Panama City Beach Parkway, Hutchison Beach Boulevard, Front Beach Road, Thomas Drive, South Thomas Drive, Highway 22, Highway 389, Highway 390, 23rd Street (State Road 368), and those portions of Highway 77, Highway 79 and Highway 231 lying Southerly of each highway's intersection with County Road 388.

The proposed scenic corridors were identified in the resolution attached to Board Memo No. 294. Approved on April 3rd, 2001, the memo directs the planning commission to study such a designation. *Official designation is still pending.* The second paragraph of the resolution reads as follows:

Whereas, the Board desires to consider the designation of Panama City Beach Parkway from Hathaway Bridge to Phillips Inlet Bridge and US Highway 231 from CR 2301 to its terminus in Panama City as "Scenic Corridors"

This layer was created on March 2001 by Bay County GIS staff. Using a copy of the **roads.shp** layer, the roads identified above were selected and unioned using ArcView 3.2. Roads not identified above were deleted. Of the original attribute items, only **miles**, **ownership**, **full_name** and **alias** were kept; the item **corridor** was added. The roads centerline layer was originally created in 1996 by Camp Dresser and McKee Inc. For more information on the roads layer, please read **roads.doc**.

This data is provided with the understanding that the conclusions drawn from such information are solely the responsibilities of the user. The GIS data is not a legal representation of the features depicted, and any assumption of the legal status of this data is hereby disclaimed. Errors or omissions should be reported to the Bay County GIS Division 850-784-6171.

Attribute Table Structure

Item Name	Width	Output	Type	Decimals
miles	10	10	N	2
ownership	10	10	C	-
full_name	40	40	C	-
alias	50	50	C	-
corridor	25	25	C	-

Attributes

miles

Mileage computed using **length** divided by 5280.

ownership

Road ownership by either US, state, county, or city, indicating who is responsible for maintenance; taken from AutoCAD dwg files, USGS quadrangle maps, and county lists; *needs verification*.

full_name

Full street name.

Combines **streetname** plus **streettype** e.g. 19TH ST
or **ftpre** plus **streetname** e.g. HWY 98

alias

Other street name, identifying highway number, different spelling, different street type, or alternative name.
In some cases, same as **full_name**

corridor

Identifies whether the corridor is either "Tourism" or "Scenic and Tourism"
